

MAIPATO NKEBENYANE

Junior Software Developer

I have a clear, logical mind with a practical approach to problem-solving and a drive to see things through to completion. I have strong technical skills as well as excellent interpersonal skills, that enabling me to interact with others. I am eager to be challenged in order to grow and further improve my IT skills. My greatest passion in life is using my technical skills to benefit other people and organizations. My experience is biased towards JavaScript and its related frameworks. I am however open to tackling new challenges and working with new technologies including new languages, tools and frameworks.

favorite quotes

“Reusability is key in reducing bugs and coding quickly. The more I use a piece of code, the more confident and familiar I become with it, which in turn significantly speeds up my development time.”

WORK EXPERIENCE

● May 2020 - Present **Freelance (Web Developer)** **Self Employed**

As a freelance developer, I have been building websites for clients based on their specifications and also offering maintenance services. In most cases I use HTML, CSS, JavaScript, PHP and MySQL. My work includes integrating data from various back-end services and databases, gathering and refining specifications and requirements based on technical needs.

● Feb 2019 - Present **Developer** **American Tower**

- Testing software and fixing problems.
- Maintaining systems once they are up and running.
- Being a part of technical designing.
- RPA (Integrate systems using UiPath)
- Automated the imports/exports of Oracle Apex applications from one environment to another using Jenkins CI/CD, SVN and PL/SQL on tomcat servers.
- Created a gamified app for the office to earn rewards through completing work objectives such as completing projects ahead of time, using react native and python.

● Sep 2017 – Jan 2018 **Coding Coordinator** **Code for Change**

Teaching high school learners how to code, helping them to understand all the basics of CSS and HTML using the CodeJika platform.

PROJECTS

- **Camagru**
a small web application
allowing you to make basic
photo and video editing
using your webcam and
some predefined images.
- **Matcha**
A dating website
- **avaj-launcher (JAVA
language Projects)**
